VISION WINE & SPIRITS ADDS NEW GIN FROM SPAIN

Vision Wine & Spirits recently became the exclusive U.S. importer for Master's Selection London Dry Gin.

Master's Selection is a premium London Dry style gin produced in Vilanova i la Geltrú, Spain, at the Giro family-owned MG Distillery, which was founded in 1835. It is made only from classic Gin botanicals.

The triple-distilled gin starts with a double pot-stilled grain alcohol that is redistilled with juniper from the Giro family's own property in the Spanish Pyrenees, coriander from Andalusia and cardamom from Guatemala. Contiguously, sweet oranges from Valencia and bitter oranges and lemons from Seville all macerate individually for a year. Finally, the first distillation of juniper, coriander and cardamom is blended with the citrus distillation and is bottled at 87.8 proof in a proprietary dark blue bottle at SRP \$32.99.
